

Conditions		
General Care: normal/thick nail trim		
Nail conditions	<p>Fungal nail (Onychomycosis), also known as tinea unguium, is a fungal infection of the nail. This condition may affect toenails</p>	<p>Ingrown toe nail (Onychocryptosis), is a common form of nail disease. It is an often painful condition in which the nail grows.</p>
Skin conditions:	<p>Corn is a specially shaped callus of dead skin that usually occurs on thin skin surfaces. They can sometimes occur on the thick plantar skin and dorsal toes</p>	<p>Callus (hard skin) is an area of skin which has become relatively thick and hard in response to repeated friction, pressure, or other irritation.</p>

Verruca (plantar wart) is a virus infection, it can occur on the sole of the foot

Cracked heel is a common health problem and it may cause infections.

Injuries of ankle, foot, digit, and nail injuries (under ACC free orthotics*, or surcharge only)

*You need to book an appointment and discuss this with a podiatrist

<p>Foot, leg and low back pain because of abnormal gait</p> 	<p>Bunion pain is a deformity of the joint connecting the big toe to the foot. The big toe often bends towards the other toes and the joint becomes red and painful. Onset is gradual. Complications may include bursitis or arthritis.</p>	<p>Leg pain</p> 
		<p>Low back pain</p> 
	<p>Plantar Fasciitis (heel pain) is a disorder that results in pain in the heel and bottom of the foot</p> 	

Diabetes foot assessment and treatment (free if a GP gives a diabetes podiatry services-referral under Procure PHO)
